- In total, the newsfeed list at <http://dnmark.org/> until now include a list of more than 45 entries. Moreover, the DNMARK participants contributed to a series of oral presentations during meetings with farmers and other relevant stakeholders, locally, nationally, and internationally.
- Especially, the agriculture and food production related educations at Aarhus and Copenhagen University have gained from results and practical examples from the DNMARK research components. This include input to MSc thesis and other project topics - see for example Dalgaard (2015) below, and Høie (2014) above (reference no. 40). Moreover, the DNMARK study sites are used as excursion sites, for example during the Agroecology BSc course at Aarhus University. Finally, the DNMARK results are used in broader public education, like the following public blog:
